

Assignment:-1

Task 1:- Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments')

Types of Printers, Scanners, and Webcams

Device	Type	Real-Life Use
Printer	Inkjet Printer	Printing college assignments
Printer	Laser Printer	Printing office documents
Printer	3D Printer	Making small 3D models
Scanner	Flatbed Scanner	Scanning photos and documents
Scanner	Sheet-fed Scanner	Scanning many office papers
Webcam	USB Webcam	Attending online classes
Webcam	Built-in Webcam	Video calling with family

Task 2:- Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

Task 3:- List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage Hint Think about speed, convenience, and compatibility.

Peripheral Connection Interfaces

Connection Interface	Advantage	Disadvantage
USB	Fast and easy to connect.	Needs a cable.
Wi-Fi	No cable is needed and many devices can connect.	Can be slow if the Wi-Fi signal is weak.
Bluetooth	Easy to connect without cables.	Has a shorter range and can be slower than USB.

Task 4:- Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required

How to Connect a Printer to a Computer

Device: Printer

Step 1: Turn on the printer and computer.

Step 2: Take a USB cable and connect to the printer.

Step 3: Connect the USB cable to the computer.

Step 4: Wait for the computer to detect the printer.

Step 5: Install the printer driver if the computer asks for it.

Step 6: Open the printer settings on the computer and select the printer.

Step 7: Print a test page to check if the printer is working.

Result: The printer is now connected and ready to print documents.
